In Room Toiletries

We have swapped out our individual use toiletries for a pump action option reducing the use of single use plastic from our bedrooms.

In Room Amenities

We have swapped out our in-room amenities for those that are sustainable. Made from wheatgerm, they are biodegradable and plastic free.

The Green Tourism Award

16 of our hotels have achieved the Silver award. The rest all have a Bronze award.

Too Good To Go

A social impact company driving a movement against food waste. The app is the world's largest B2C marketplace for surplus food. The app connects users with our hotels that have surplus food. So far, we have saved over 22k meals from ending up in waste and therefore saved 55 tonnes of carbon.

Refillable Bottled Water

Through our partnership with Purezza, we have installed filtered water dispensers at properties so we can remove disposable water bottles from our bedrooms and meetings & events spaces. Reducing glass waste by 50 tonnes per year.

The Brain Charity

The Brain Charity helps people with all forms of neurological conditions to lead longer, healthier, happier lives. They are a national charity with free services available to anyone in the UK needing support with their condition.

Period Care

Complimentary period products in all our rooms and team member toilets. We work with a company called Freda who make a range of chemical free, sustainable products and donate profits to help period poverty.

Dripdrop

After a successful trial we are working with **Dripdrop** to install an umbrella dispensing machine in all hotels. Umbrellas are made from recycled bottles. Every time an umbrella is hired, Dripdrop plant a tree. We believe this will result in 200k trees being planted per year
